

Hi team,

We are excited to offer you health benefits through an HRA and we're partnering with a company called Take Command who will help us administer it. You will receive an email from their platform that invites you to log in and begin the process of shopping and enrolling in an individual health plan.

There are a few things you can do to prepare so your health plan shopping and selection process is smooth and efficient.

1. Think about your health needs

- Make a list of prescriptions, preferred health providers, and any planned procedures for the upcoming year.
- Gather birthdates and SSNs for yourself and any family members you want to include on your plan.

2. Look for emails from Take Command

- Make sure to open them, read them, and take action to shop & enroll.
- Don't miss out on extra support for your health insurance, Take Command is here to help guide you through this process!

Take Command is looking forward to helping you choose health insurance plans with the coverage that meets your needs. Please reach out to me or the Take Command team with any questions throughout your enrollment process.

Thanks!
